Effective Date 2020-Oct-21

Sub-Certification Confirmation Letter
In reference to application ID: SUAPPL200011

We hereby issue the Sub-Certificate for:

Company	TEXPRO SPA
---------	------------

Product Specification according to the Original Certificate:

Product name	E20103 50D*60S 4/1
Composition	LENZING™ Viscose EV 51%, Viscose Filament/ Rayon Filament 49%
Fabric construction	ECOVERO SATEN VISCOSE
Product type	Woven
Fabric weight	90 g/m ²

We have assessed the application according to our procedures, as well as a sample in case requested separately, according to the Lenzing Certification Terms.

The assessment results are not in conflict with the specifications according to the application, so we hereby issue the Sub-Certificate with the following sub-certificate number (the "Sub-Certificate-Number"):

320890100010

The Sub-Certificate is valid until 2022-Oct-22 and might only be used in accordance with the Lenzing Certification Terms and only in connection with a product meeting the specifications above.

Any Product License obtained in the Lenzing E-Branding Services will require a valid Sub-Certificate Number, so you might share the Sub-Certificate Number with your valid customers enabling them to apply for Brands like TENCEL™, LENZING™ ECOVERO™, REFIBRA™, LENZING™ for Protective Wear and LENZING™ for Work Wear for all end use products containing a certified component.

The following fiber type will be used to determine the applicable Brand / Branded Offer and technology when applying for a Product License:

LENZING™ Viscose EV

Please note:

Unfinished means that the sample must be processed by a suitable garment-wash-process. Wash shrinkage on unfinished fabrics is not a Lenzing Fiber related property and therefore, we have discounted testing of this property.

All tests are carried out according to Lenzing's internal certification procedures and in accordance with the Certification Standards and Lenzing Certification Terms. So the test results cannot be considered as a:

- confirmation for material composition,
- quality certificate,
- confirmation to comply with any kind of certification standard applicable for the product,
- confirmation that the product meets the required performance of the end use product or the desired application,
- or confirmation that the product meets any kind of standards requested by customers or other third parties.

Lenzing might at any time request additional samples of the product. The Sub-Certificate will be immediately withdrawn if the product is not meeting the specifications above or is not in compliance with Lenzing Certification Terms and Certification Standards.

Best regards
Lenzing Aktiengesellschaft
